

EXPERIENCE

- **Amazon Web Services** New York, NY
Software Development Engineer *August 2019 - Present*
 - Developed large scale and high throughput billing orchestration for all of the millions of AWS customers.
 - Designed and created a way of simplifying computing bills to enable faster iteration and higher velocity to meet business needs of complex product offerings.
 - Set the a high bar for code quality by designing and introducing CI/CD pipelines for internal services to increase team velocity.
- **Bank of America Merrill Lynch** New York, NY
Technology Analyst Program Intern *June 2018 - Aug 2018*
 - Developed a web application for compliance manager to create, edit, and delete compliances and easily view violated compliances with the corresponding items using React.js and Python
 - Designed and created a web application for project management for employees to easily and proactively collaborate with one another on a project using React.js and Python
 - Assisted in developing test automation using Selenium to automate testing the UI in order to allow developers to automate the tests and not manually test them
- **Ford Foundation** New York, NY
Program Systems Developer Intern *June 2017 - Aug 2017*
 - Assisted in the migration of all the data of the company to a completely new service to increase efficiency of achieving the company's goals by developing evaluations to test the validity and integrity of the data in the new platform
 - Maximized performance and data accuracy by analyzing and debugging SQL scripts that retrieved data from the Foundation's database to process into data that can be analyzed through software
 - Collaborated with team members to assess and tackle problems addressed by users
- **CodePath / Facebook** New York, NY
Technical Program Manager *August 2018 - December 2018*
 - Assist and guide students with current ongoing projects to ensure students will learn from the course material and adhere to meet deadlines for assignments
 - Liaise between students and CodePath employees regarding problems or potential concerns

EDUCATION

- **City College of New York** New York, NY
Bachelor of Science in Computer Science; GPA: 3.52 *Aug. 2015 - May. 2019*

PROJECTS

- **EZPARKN**
 - Created RESTFul Backend API's using Node.js and Express.js for the frontend to consume and manipulate the data accordingly
 - Led the team using agile methodologies to create a web application that allows users to find parking easily on campus
 - Integrated Continuous Deployment and Automated Testing by using Mocha.js to automate the tests and continuously deploy on every accepted pull request to the main master branch
- **Coding Turkish System**
 - Designed and developed a web application which allowed clients to post projects which developers would bid on and express their wishes to work on the project to connect the clients and developers
 - Implemented in usage of recent technologies and libraries such as React.js, Node.js, MongoDB and Git
 - Partook in multiple team meetings to perfect the system then launch it using Amazon Web Services

PROGRAMMING SKILLS

- **Programming Languages:** Java, Python, Javascript/Typescript
- **Technologies:** React, Node.js, Flask, Selenium
